

Source and Coverage Register

Course: TGS-2024045795 - Microsoft Copilot for HR Version: 6.3 Reviewed: 27 September 2026

The course preserves the useful HR-lifecycle coverage of the supplied v5 trainer deck, while replacing the old generative-AI-only framing with a clear capability boundary: Microsoft 365 Copilot for human-directed generation and analysis; Agent Builder or Microsoft Copilot Studio for bounded agents, tools and workflows.

Source	Course contribution	Access status
Official course page	Course identity, duration, TSC, learning outcomes and assessment instruments	Reviewed
IBM - AI in HR	HR AI categories, employee service and lifecycle use cases	Reviewed
IBM - AI agents in HR	Agent autonomy, orchestration, lifecycle uses and human oversight	Reviewed
McKinsey - four ways to start	Bounded early use cases, risk management and returning time to human interaction	Reviewed
Gartner - AI in HR	AI strategy, skills intelligence, human-centred adoption and measures	Reviewed
Microsoft - AI for HR	Microsoft 365 Copilot use across recruitment, onboarding, performance and workforce insight	Reviewed
SAP - AI for HR	Recruiting, onboarding, talent, employee experience and governance	Reviewed
Zendesk - AI workflow automation in HR	Self-service, leave, benefits, onboarding/offboarding and privacy foundations	Reviewed
Auxis - AI in HR	Pilot selection, AI literacy, governance, data readiness and KPIs	Reviewed
Kore.ai - agentic AI in HR	Agentic employee-service and orchestration perspective	Reviewed
HiBob - agentic AI in HR	Requested perspective	Page unavailable during review; not used for a unique factual claim
Moveworks - agentic AI in HR	Reasoning, orchestration and action across enterprise systems	Reviewed
HRCI - agentic AI in HR	Predictive/generative/agentic distinction, autonomy risk and digital-worker governance	Reviewed
ValueX2 - agentic HR systems	Requested systems perspective	Accessible; used as supplementary context only
HR Executive - people leader explainer	Requested people-leader perspective	Page did not render reliably; not used for a unique factual claim
PwC Strategy& - agentic AI in HR	Transactional automation, strategic augmentation, orchestration and operating foundations	Reviewed
Microsoft - transform HR with agents	Recruiting, onboarding, lifecycle, leave and employee-service agent examples	Reviewed

Source	Course contribution	Access status
Microsoft Copilot Studio	Agent design, tools, workflows, channels and governance	Reviewed
AW InfraCloud - HR agent guide	Policy Q&A pattern, grounding, flows, testing and publication	Reviewed
Supplied YouTube video	Requested demonstration reference	Page metadata unavailable during review; not used for a unique factual claim
Microsoft - Employee Self-Service Agent	Leave and employee-request self-service patterns	Reviewed
Microsoft - onboarding and development scenario	Policy summarisation, network identification, personalised onboarding and agent creation	Reviewed
Singapore PDPC - Model AI Governance Framework	Human-centric, transparent, explainable and fair AI; governance, involvement, operations and communication	Reviewed
Singapore MOM - Fair Consideration Framework	Fair consideration and prohibition of non-job-related discriminatory hiring criteria	Reviewed
Tertiary Exams practice platform	Optional practice access surfaced in the assessment-readiness visual; actual WSQ assessment remains on the LMS	Reviewed
Deloitte - *The Future of HR, Powered by AI* (user-supplied reference deck)	HR pain and urgency, automate/augment/extend/create shifts, AI-assisted to AI-powered evolution, AI-powered operating model and enterprise value	Reviewed from local reference
AI Revolution in Human Resources: Transforming HR Management with Artificial Intelligence (2023 user-supplied ebook)	Recruitment, employee experience, talent analytics, wellness, performance, technology integration, implementation patterns and four secondary-source case vignettes	Reviewed from local reference

Cross-artifact coverage

Requirement	Slides	Learner Guide	Labs	Assessment
Core value message: less administration, higher productivity and more strategic HR capacity	Opening sequence and closing synthesis	Dedicated course-message table and facilitation prompts	Evidenced and debriefed in Labs 1-12	K1-K3, A1-A5
Generative AI using Microsoft 365 Copilot	Yes	Detailed procedures	Labs 1-4, 6-7, 10 and 12	K1-K2, A1-A2
Agentic AI using Agent Builder / Copilot Studio	Yes	Detailed procedures	Labs 5-9 and 11; governed portfolio in 12	K1, K3, A1, A3-A5
Talent needs and job description	Yes	Yes	Labs 1-2	K2-K3, A1
Resume screening and structured interviewing	Yes	Yes	Labs 3-4	K2, K4, A2
Onboarding and talent development	Yes	Yes	Labs 5-6	K2-K3, A1
HR policy	Yes	Yes	Lab 7	K2-K4, A4
Leave applications and benefits	Yes	Yes	Labs 8-9	K3-K4, A3
Wellness and offboarding	Yes	Yes	Labs 10-11	K2, K4-K5, A4-A5
Full-lifecycle HR agent operations	Yes	Yes	Lab 12	K3-K5, A3-A5
Legal, ethical, privacy, security and fairness	Yes	Yes	Embedded in every activity	K4-K5, A2-A5

No production employee data are used in the labs. HarbourLight Logistics SG and all learner records are fictional. The four unnamed implementation vignettes are explicitly presented as secondary-source examples from the supplied ebook rather than independently verified company identities.
